Vol. 95 No. 1

- Fine silica powder modified with quaternary ammonium groups: reactivity and characteristics
T. Suhara, T. Kanemaru, H. Fukui and M. Yamaguchi (Yokohama, Japan) 1
- Effect of the osmotic conditions on the value of ζ potential of DMPC multilamellar liposomes
J.M. Alonso, C. Ll  cer, A.O. Vila, J.E. Figueruelo and F.J. Molina (Valencia, Spain) 11
- Ultracentrifugation sedimentation profiles: a technique for measuring colloid–surfactant interactions in non-aqueous solvents
B.L. Papke, C.K. Esche and L.M. Robinson (Beacon, NY, USA) 15
- The extent of errors associated with contact angles. 3. The influence of surface roughness effects on angles measured using a Wilhelmy plate technique for powders
G. Buckton, P. Darcy and D. McCarthy (London, UK) 27
- Concentrated coal–water suspensions containing nonionic surfactants and polyelectrolytes. 2. Adsorption of nonyl phenyl propylene oxide–ethylene oxide on coal and the rheology of the resulting suspension
L. Trochet-Mignard and P. Taylor (Bracknell, UK), G. Bognolo (Everberg, Belgium) and Th.F. Tadros (Bracknell, UK) 37
- Interparticle forces arising from adsorbed polyelectrolytes in colloidal suspensions
Y.K. Leong, P.J. Scales, T.W. Healy and D.V. Boger (Parkville, Vic., Australia) 43
- Physicochemical characterization of ceria as a final decomposition product of ammonium cerium(III) oxalate hydrate
G.A.M. Hussein and H.M. Ismail (El-minia, Egypt) 53
- Nonequilibrium properties of fluid interfaces: aperiodic diffusion-controlled regime. 2. Experiments
G. Loglio (Florence, Italy), R. Miller (Berlin, Germany), A. Stortini, U. Tesei, N. Degli Innocenti and R. Cini (Florence, Italy) 63
- Surface rheological properties of sodium stearyl-2-lactylate (SSL) and diacetyl tartaric esters of mono (and di) glyceride (DATEM) surfactants after a mechanical surface treatment in relation to their bread improving abilities
J.J. Kokelaar, J.A. Garritsen and A. Prins (Wageningen, The Netherlands) 69
- Brief note*
- Response of the LAB-TEC 100 to petroleum emulsions
S.L. Mason, K. May and S. Hartland (Z  rich, Switzerland) 79

Vol. 95 Nos. 2/3

Review

- Oxide/electrolyte interface: electric double layer in mixed solvent systems
M. Kosmulski (Lublin, Poland) 81
- Interpreting titration data of aqueous latices by coupling ionization and ion-exchange equilibria
M. Hlavacek, P. Chenevi  re, M. Sardin and J. Dodds (Nancy, France) 101
- Concept of surface interaction energy densities: basis for emulsifying properties of organic solvents immiscible with water
L. Richter and D. Vollhardt (Berlin, Germany) 113

Electroosmosis of the second kind N.A. Mishchuk and P.V. Takhistov (Kiev, Ukraine)	119
Phase transitions and glass-like behaviour of amphiphile assemblies M.V. Voinova (Kharkov, Ukraine)	133
The triple layer model revised L. Righetto, G. Azimonti and T. Missana (Milan, Italy) and G. Bidoglio (Varese, Italy)	141
Morphological and viscoelastic properties of dense foams generated from skin cleansing bars S. Mukherjee and H. Wiedersich (Edgewater, NJ, USA)	159
Equilibrium and dynamic behavior for systems containing nonionic surfactants, <i>n</i> -hexadecane, triolein and oleyl alcohol Sh.M. Zourab and C.A. Miller (Houston, TX, USA)	173
An attenuated total internal reflectance spectroscopy study of $E_T(30)$ at the free oil–water interface J.M. Perera, G.W. Stevens and F. Grieser (Parkville, Vic., Australia)	185
Monolayers of dipalmitoylphosphatidylcholine at the oil–water interface M. Thoma (Mainz, Germany) and H. Möhwald (Berlin, Germany)	193
Effects of mixed alkanols as cosurfactants on single phase microemulsion properties A.C. John and A.K. Rakshit (Baroda, India)	201
The influence of adenine content on the properties of Q-CdS clusters stabilized by polynucleotides S.R. Bigham and J.L. Coffey (Fort Worth, TX, USA)	211
Solutions of the shear-induced coalescence equations for polydisperse emulsion droplets using Monte Carlo and moments techniques H. Mousa and T.G.M. van de Ven (Montreal, Que., Canada)	221
Effect of chain length on acoustic behaviour of chromium soap solutions in xylene and methanol mixture K.N. Mehrotra and M. Jain (Agra, India)	229
A study of dynamic interfacial mechanisms for demulsification of water-in-oil emulsions Y.H. Kim and D.T. Wasan (Chicago, IL, USA) and P.J. Breen (Houston, TX, USA)	235
The role of surface conformations in the deposition kinetics of humic matter-coated colloids in porous media A. Amirbahman and T.M. Olson (Irvine, CA, USA)	249
Electrokinetic behaviour of $F(ab')_2$ fragments adsorbed onto positively and negatively charged polymer colloids J.L. Ortega-Vinuesa, A. Martín Rodríguez and R. Hidalgo-Alvarez (Granada, Spain)	261
Adsorption of salicylate and polyacrylate on mesoporous aluminas F. Thomas, E. Schouller and J.Y. Bottero (Vandœuvre les Nancy, France)	271
Dynamic surface tensions and dynamic surface potentials of aqueous solutions of a cationic surface active electrolyte G. Geeraerts, P. Joos and F. Villé (Wilrijk, Belgium)	281
Effects of spreading solvents on the monolayers of poly(methyl methacrylate) S.J. Collins, G.N. Mahesh, G. Radhakrishnan and A. Dhathathreyan (Madras, India)	293
Interaction of colloidal dispersions of non-stoichiometric polyelectrolyte complexes and silica particles H.-M. Buchhammer, G. Kramer and K. Lunkwitz (Dresden, Germany)	299
Voltammetric analysis of the competition between calcium and heavy metals for complexation by humic material M.A.G.T. van den Hoop and H.P. van Leeuwen (Wageningen, The Netherlands), J.P. Pinheiro, A.M. Mota and M. de L. Simões Gonçalves (Lisbon, Portugal)	305
